BPM

COLABORATIVE WORKER

TEAM MENAGER

professional experiences

INFRAERO
AEROPORTOS

[since 2010]

As an economist I have worked on pricing, budgeting, requirement elicitation, economic-financial analysis, management and supervision of outsourcing.

In the last seven years, I have taken on coordination and management positions in this area, participating in processes of remodeling the organizational structure and mapping activities, resizing teams, optimizing contract's portfolio, reviewing and defining standards procedures, as well as the incorporation of management activities into a shared services center (SSC).

[between 2007-10]

I worked in the business areas (management of individual and corporate portfolios). This experience helped me to develop skills such as focus on achieving goals and serving the public.

Fundação de
Economia e
Estatística

Economic consulting

[between 2003-10]

I had professional experiences in FEE and in economic consulting activities, performing GDP estimates, price indices and econometric models of demand, in addition to preparing technical reports. These experiences helped me to develop skills associated with economic analysis, text production and data processing.
